

Good afternoon!

This is the Anderson Island Noontime Net and is an opportunity for Islanders to practice radio operation and share news and happenings. This is a directed net where all traffic goes through net control. My name is _____ and my GMRS call sign is _____. I will be the net control for today.

All licensed GMRS operators on Anderson Island are welcome to participate. Anyone can break in to report emergency traffic. Is there any emergency traffic? (pause)

Hearing none, the Net is now open. I will take a list of check-ins of call signs and first names. Please speak slowly and avoid pile-ups. If you only wish to be put on the log and have nothing further to say, then add the words "in & out" to your check-in. Net control will acknowledge each check in. After the check-in list is compiled, net control will give each station the opportunity to share news and happenings. Who would like to check in? Please give your call sign and your first name.

..... run net

We are at the end of our list. Are there any additional check-ins? Please come with your call sign and first name.

.... run net....

Hearing no more check-ins, this noontime net is closed at _____. This frequency is now clear for normal radio use. Thank you.
